The fee corresponds to a percentage of the over-the-limit volume of deposits on the last day of the month concerned. The over-the-limit volume of deposits equals the positive difference between the balance of deposits in the relevant currency on the last day of the month concerned and the aforementioned limit. The balance of deposits consists of cash deposited on the client's Brokerage Account in the relevant currency. Patria Finance is entitled to charge this fee once a month (retrospectively for the previous month) and debit it in the currency of the respective deposit.

5. DEBIT INTEREST

Default interest (debit balance in brokerage account) – 0.1% of the outstanding amount per day (does not apply to clients who have arranged for a different amount of interest in the Contract on arranging purchase or sale of securities and other investment instruments).
